

20, Elmwood Road
 THATCHAM
 RG29 3DH

Building type: Detached bungalow
 Date of assessment: 14 July 2010
 Date of certificate: 14 July 2010
 Reference number: 0870 6074 6750 0000 1000
 Type of assessment: RDSAP, existing building
 Total floor area: 150 m²

This home's performance is rated in terms of the energy use per square metre of floor area, energy efficiency based on fuel costs and environmental impact based on carbon dioxide (CO₂) emissions.

Energy Efficiency Rating

England & Wales

 The Energy
 Rating Scale

The energy efficiency rating is a measure of the overall efficiency of a home. The higher the rating the more energy efficient the home is and the lower the fuel bills are likely to be.

Environmental Impact (CO₂) Rating

England & Wales

 The Energy
 Rating Scale

The environmental impact rating is a measure of a home's impact on the environment in terms of carbon dioxide (CO₂) emissions. The higher the rating the less impact it has on the environment.

Estimated energy use, carbon dioxide (CO₂) emissions and fuel costs of this home

	Current	Potential
Energy use	156 kilowatt per year	106 kilowatt per year
Carbon dioxide emissions	4.8 tonnes per year	4.7 tonnes per year
Lighting	£18 per year	£76 per year
Heating	£550 per year	£370 per year
Hot water	£144 per year	£144 per year

The figures in the table above have been provided to enable prospective buyers and tenants to compare the fuel costs and carbon emissions of one home with another. To enable this comparison the figures have been calculated using standardised running conditions (heating periods, room temperatures, etc.) that are the same for all homes, consequently they are unlikely to match an occupier's actual fuel bills and carbon emissions in practice. The figures do not include the impacts of the fuels used for cooking or running appliances, such as TV, fridge etc., nor do they reflect the costs associated with services, maintenance or safety inspections. Always check the certificate date because fuel prices can change over time and energy saving recommendations will evolve.

To see how this home can achieve its potential rating please see the recommended measures.

Remember to look for the energy saving recommended tag when buying energy efficient products. To a quick and easy way to identify the most energy efficient products on the market. The EPC and recommendations report may be given to the Energy Saving Trust to provide you with information on improving your building's energy performance.
