

Energy performance certificate (EPC)

! This certificate has expired.

| | | | |
|---|---------------------------|------------------------------|---------------------------------|
| Flat 11 Hawkrige Court Cherbury Close BRACKNELL RG12 9JQ | Energy rating D | This certificate expired on: | 14 September 2025 |
| | | Certificate number: | 8365-7021-3100-2965-7996 |

Property type

Top-floor flat

Total floor area

61 square metres

Rules on letting this property

Properties can be let if they have an energy rating from A to E.

You can read [guidance for landlords on the regulations and exemptions \(https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance\)](https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance).

Energy rating and score

This property's energy rating is D. It has the potential to be C.

[See how to improve this property's energy efficiency.](#)

The graph shows this property's current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

- the average energy rating is D
- the average energy score is 60

Breakdown of property's energy performance

Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

| Feature | Description | Rating |
|--------------|---|-----------|
| Wall | Timber frame, as built, insulated (assumed) | Good |
| Roof | Pitched, 100 mm loft insulation | Average |
| Window | Fully double glazed | Average |
| Main heating | Room heaters, electric | Very poor |

| Feature | Description | Rating |
|----------------------|---|--------|
| Main heating control | Appliance thermostats | Good |
| Hot water | Electric immersion, off-peak | Poor |
| Lighting | Low energy lighting in 17% of fixed outlets | Poor |
| Floor | (another dwelling below) | N/A |
| Secondary heating | None | N/A |

Primary energy use

The primary energy use for this property per year is 300 kilowatt hours per square metre (kWh/m²).

[▶ About primary energy use](#)

Primary energy use is a measure of the energy required for lighting, heating and hot water in a property. The calculation includes:

- the efficiency of the property's heating system
- power station efficiency for electricity
- the energy used to produce the fuel and deliver it to the property

How this affects your energy bills

An average household would need to spend **£731 per year on heating, hot water and lighting** in this property. These costs usually make up the majority of your energy bills.

You could **save £298 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2015** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

Heating this property

Estimated energy needed in this property is:

- 3,467 kWh per year for heating
- 1,934 kWh per year for hot water

Impact on the environment

This property's environmental impact rating is D. It has the potential to be D.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO₂) they produce each year.

Carbon emissions

| | |
|--------------------------------------|-----------------------------|
| An average household produces | 6 tonnes of CO ₂ |
|--------------------------------------|-----------------------------|

| | |
|-------------------------------|-------------------------------|
| This property produces | 3.1 tonnes of CO ₂ |
|-------------------------------|-------------------------------|

| | |
|---|-------------------------------|
| This property's potential production | 2.7 tonnes of CO ₂ |
|---|-------------------------------|

You could improve this property's CO₂ emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

Steps you could take to save energy

▶ [Do I need to follow these steps in order?](#)

Yes. Each step builds on the one before it so you can save the most energy.

For example, it's more energy efficient to insulate your home before you buy a new boiler. A well insulated home will lose less heat so you do not have to run your boiler as often.

Step 1: Increase loft insulation to 270 mm

| | |
|--|-------------|
| Typical installation cost | £100 - £350 |
| Typical yearly saving | £81 |
| Potential rating after completing step 1 | 67 D |

Step 2: Low energy lighting

| | |
|---|-------------|
| Typical installation cost | £25 |
| Typical yearly saving | £25 |
| Potential rating after completing steps 1 and 2 | 68 D |

Step 3: High heat retention storage heaters and dual rate meter

| | |
|--|-----------------|
| Typical installation cost | £1,200 - £1,800 |
| Typical yearly saving | £191 |
| Potential rating after completing steps 1 to 3 | 78 C |

Who to contact about this certificate

Contacting the assessor

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

| | |
|------------------------|--|
| Assessor's name | Simon Drew |
| Telephone | 07903569026 |
| Email | simon.drew1962@live.com |

Contacting the accreditation scheme

If you're still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

| | |
|-----------------------------|--|
| Accreditation scheme | Stroma Certification Ltd |
| Assessor's ID | STRO005724 |
| Telephone | 0330 124 9660 |
| Email | certification@stroma.com |

About this assessment

| | |
|-------------------------------|------------------|
| Assessor's declaration | No related party |
|-------------------------------|------------------|

| | |
|----------------------------|--|
| Date of assessment | 15 September 2015 |
| Date of certificate | 15 September 2015 |
| Type of assessment | <p>▶ RdSAP</p> <p>RdSAP (Reduced data Standard Assessment Procedure) is a method used to assess and compare the energy and environmental performance of properties in the UK. It uses a site visit and survey of the property to calculate energy performance.</p> <p>This type of assessment can be carried out on properties built before 1 April 2008 in England and Wales, and 30 September 2008 in Northern Ireland. It can also be used for newer properties, as long as they have a previous SAP assessment, which uses detailed information about the property's construction to calculate energy performance.</p> |
